## PLAY WAS GREAT SUCCESS

The play "Truth takes a Holiday" which was staged last Friday night in the school in aid of the School Fair Funds was a great success in every way and reflects great credit both on the players and on their young director, Miss Otto. The following were the artists: Charles Bennett (Tom Walker), Earl Robinson (Bud Walker), two sons on the farm with their mother which part was ably taken by Miss Jensen. The part of "Pete Moss" the hired man, was in the capable hands of Lyle Milligan, who as usual acted the part excellently and natural. The part of his sweetheart was taken by Mabel Gilbertson who did full justice to her part as the flighty but loving "Posey". Mrs. L. Cooley as "Aunt Harriet" with her prodigious appetite and consequent indigestion was a scream, whilst Marjorie Lee as her more dignified daughter "Rebecca" made a pretty and lovable heroine. (has Bennett as the dressy, deceitful "son of the soil" and Earl Robinson as the honest hard working hero, both had very difficult roles to play, but they certainly acted very natural and convincingly. All the players made a big success of their task.

In spite of bad roads and cold weather the school house was well filled with an enthusiastic audience. Following the play lunch was served after which dancing was engaged to the fine music of the Gullekson girls' Orchestra from Excel. Over \$30 was realized above expenses. Mesdames Stewart, Otto, Shier and Todd were in charge of the refreshments.

Mr. R. Scott of Oyen made an efficient chairman. The players plan to visit Youngstown Friday night and Oyen a week from Friday at which places we predict further success.

Mrs. Mortimer will be hostess to the "Friendly Circle" next Wednesday.

The Ladies Card Club met Tuesday night at the home of Mrs. Meeres. Honors were shared by Miss Betty Milligan and Miss Joan Bayley. The Club will meet next week at the home of Mrs. Peyton.

Miss Andry Neff, of Hanna, is visiting for a week or two at the home of her sister, Mrs. J. C. Turple.

Mrs. Jas. Peyton spent a few days in Calgary last week. Mr. O. D. Harrington and Mr. E. B. Allen shipped a car load of cattle from this district to Calgary this week.

Art Campbell who spent the week end at Calgary returned Tuesday.

A few ladies met on Wednesday evening at the home of Mrs. F. Otto which took the form of a surprise. The party should have gathered Monday in place of Wednesday, then it would have served two purposes being April 1st. A very happy evening was spent in playing dominos & etc.

Collins U. F. A. will meet at Cloverleaf on Saturday, April 13 at 2 p.m. Mr. N. D. Stewart will give a report on the Acadia Co-operative Association.

There will be a dance at Rainbow hall on May 3 Ladies please bring lunch.

A very pleasant evening was spent at Cloverleaf last Friday evening. The ladies prize was won by Mrs. Hogan and the consolation by Mrs. Naylor. Gents prizes were won by Mr. H. Hogan and Mr. P. Seeger.

Lewis Hittle returned Wednesday morning from Olds Agriculture College where he has been the last three months.

N. F. Marcy left on Wednesday for Calgary where he will attend the Social Credit Convention.

Mrs. Creighton had a small party Monday for her 1 year old daughter, Doreen. The three little girls were also one year old viz. Marlene Stewart, Maxine Pfeiffer, Kay Bennett. A photo was taken of the little group.

## Social Credit Study Group

The next meeting will be held in the Ball room of the Chinook Hotel on Thursday April 11th at 8 p.m. Speakers: Dr. Cross and S. H. Smith (Harry) of Hanna.

## FARMERS ATTENTION

### GRASSHOPPER CAMPAIGN

1935

Careful surveys during the fall of 1934 indicated a slightly reduced infestation of grasshoppers in Southern Alberta for 1935. If average weather conditions obtain during the coming season it will be necessary to conduct another campaign.

### MEETINGS OF FARMERS

Districts in the severely infested areas are urged to arrange for meetings to discuss methods and measures of control.

Speakers can be supplied for a limited number of meetings.

For information and advice communicate with Department of Agriculture Fieldmen, or the Department of Agriculture, Edmonton.

### ALBERTA DEPARTMENT OF AGRICULTURE

HON. F. S. GRISDALE O. S. LONGMAN,  
Minister. Field Crops Commissioner.

### THE CARROT RUST FLY

The carrot rust fly is found in all parts of the Maritime Provinces in portions of Quebec and Ontario, extending westward in the latter province as far as Sault Ste. Marie. This insect has two broods a season, the larvae causing injury to roots in late June and September. Protection of the plants may be obtained by three methods—cultural, mechanical, and insecticidal. The cultural method is the least expensive and generally most efficient. Late planting of seed so that the seedlings will not be above ground until the second week in June affords protection from the first generation larvae. Early plantings may be protected from attack by spring generation larvae through mechanical screening during the period of fly activity, May 23 to June 12, or by treatment with insecticides during the period of egg-laying, June 10 to 12. The most effective insecticides have been found to be corrosive sublimate at 15 pounds per acre; derris powder at the same proportion; dieldrin at 5 pounds per acre, and sodium silicofluoride at 400 pounds per acre. The early removal of injured carrots with the contained larvae in spring will help keep down the autumn generation.

### Cloverleaf Social Credit Meeting

The Cloverleaf Social Credit Group held their regular meeting last Saturday, March 30th, at 2 p.m. There were about 75 present. This group is very enthusiastic and has 64 members enrolled, and we in 100 per cent Social Credit supporters to join us in this worthy movement. The next meeting will be held on Wednesday April 10th, at 8 p.m. Mr. N. B. James will give his report from the Calgary Convention.

### TESTS SHOW SILAGE KILLS WEED SEEDS

North West Grain Dealers' Association makes public results of experiments

Ensiling of weed seeds under proper conditions destroys their ability to germinate, according to experiments conducted at Manitoba Agricultural College. These tests were made over a period of years by Dr. G. P. McCrostie, Professor of Agronomy, University of Manitoba, and W. Tildesley, M. Sc. assistant on weed research, under the direction of and financed by the line elevator operators through the North West Grain Dealers' Association.

A pamphlet outlining the finding of the survey has been published and is available free of charge at all line elevators

or may be obtained by writing to the North West Grain Dealers' Association, Winnipeg. The pamphlet has been prepared in a manner which is readily understandable by the layman and can be read in the course of a few minutes.

The exact means by which ensilage kills weed seeds has not been determined as yet. Present indications are that various acids developed through ensiling play a prominent part in rendering the weed seeds in silage safe for feeding by destroying their germination.

Tests were conducted covering the following ordinary western weed seeds: Ball mustard, Barnyard Grass, Blue Burr, Broad Leaf Plantain, Cow Cocker, Falce Flax, Hares ear Mustard, Indian Mustard, Lambs Quarters Leafy Spurge

## A TEA FOR EVERY TASTE

## 'SALAD' TEA

## A Welcome Declaration Of War

The people of Canada, under the leadership of Their Excellencies the Governor-General and Lady Besborough, supported by the Dominion and Provincial Governments, all political parties, the churches, the press, the medical profession, organizations of every description, and men and women of goodwill throughout the length and breadth of the Dominion, have decided to commemorate the twenty-fifth anniversary of the accession of King George V. to the throne of the world's greatest empire on May 6 by a declaration of war.

Canadians are a peace loving people; they abhor war, and their whole history proves that they never engage in war except when absolutely forced to in self-defence, but, once in, they fight to the finish with all the strength, energy and resources they can command. Fighting in their own defence they never remain on the defensive but adopt vigorous offensive tactics to bring about the defeat of the common enemy and safeguard their own existence. History proves this to be true.

So, with the lives of thousands of their people at stake, all Canada has decided to mark the Silver Jubilee of His Majesty, who has been well described as a kindly man and a manly king, by a declaration of war upon a common world enemy—cancer. The ammunition required to prosecute this war is—money. Money is necessary in the conduct of all wars, and in 1914-1919 Canada supplied it in the hundreds of millions, yes, billions. In this new and humanitarian war a substantial war chest is essential to success, although not in the enormous sums referred to above. Every Canadian family is asked to contribute to the extent of their ability.

Mankind is forced to wage a continuing war against disease, and looking back over past years it is gratifying to know that, taken as a whole, it has been a successful war. A few years ago the great scourge was Tuberculosis, the White Man's Plague, which topped the list of diseases afflicting the race. To-day it is in retreat, now far down in the list, with a steadily diminishing number of victims.

Yellow fever, which once counted its victims by the thousands, is unknown; smallpox has been eradicated; diphtheria, which carried off children by the thousands, has been conquered through the discovery and use of anti-diphtheria serum; cholera, typhus, and other plagues are now practically unknown, with the result that the expectation of life as been more than doubled; nearly trebled, within the past 100 years.

On the other hand, the ravages of cancer continue to increase until to-day it is responsible for more deaths than any other disease with the single exception of diseases of the heart. Cancer comes second on the list and in 1933 was responsible for 10,846 deaths in Canada as compared with 7,814 only seven years previously in 1926, and the toll is progressively rising higher each year, having increased from 93.9 per 100,000 in 1931-32 to 100 per 100,000 in 1933.

This is the common enemy that now calls Canada to arms and has resulted in this Silver Jubilee declaration of war.

Contrary to a view widely held, cancer is not an incurable disease. It can be cured if it is discovered and treatment commenced in its early stages. Early diagnosis is the all-important factor. But to secure early diagnosis involves, first, education of the public, the provision of a largely increased number of qualified diagnosticians, and facilities for treatment throughout the whole country. These are the essential munitions in this war, and they cost money.

The people of Canada, the rich, the merely well-to-do, even the poor, are called upon to enlist in the army of attack on his dread enemy which is now on the offensive against our people and scoring a victory over us. As a Canadian people we must now take the offensive, take it boldly and in a large way, and fight back. If we do, success can and will be achieved.

The idea of the "King George V. Silver Jubilee Cancer Fund for Canada" is an admirable one. It will be administered by trustees and every dollar will be spent in Canada, in the saving of Canadian lives. To establish that fund each Canadian family and household is asked to contribute one dollar, or as many dollars as they can. Contributions may be sent to Lady Besborough, Government House, Ottawa, who will acknowledge every donation received, large or small, on a card bearing the portraits of the King and Queen.

Thus does Canada propose to commemorate the Silver Jubilee of His Majesty by the creation of a permanent national anti-cancer fund. It will be an expression of the loyalty and affection of the Canadian people to His Majesty and at the same time a tangible, lasting and humanitarian record of a great national event.

We are glad to add the support of this column to the nation-wide appeal now being made in support of this effort to commemorate a reign that is one of the finest in British history in a manner which has received the gracious approval of His Majesty and as something designed to be of lasting value to suffering humanity.

## The Right Of Way

According to the new traffic regulations in England the pedestrian has the right of way and motorists are not entitled to make anybody "pull back" at a crossing, the Marylebone magistrate, Ivan Snel, stated in fining a woman motorist \$250.

A police judge says women now do 70 per cent. of the driving. But men still hold the steering wheel.

## No Indication Of Quality

Cannot peas have the size of the can. No. 1 is a very small pea. No. 2 is larger; No. 3 still larger, and so on. The size of peas is no way depends on the quality nor the quality on the size.

Isinglass comes from the swimming bladder of the cod and sturgeon.

## Edwardsburg

## CROWN BRAND CORN SYRUP

AN ENERGY FOOD THAT HAS NOURISHED MORE CANADIAN CHILDREN THAN ANY OTHER CORN SYRUP

A product of The CANADA STARCH CO., Limited

## Building Traffic Subways

## Paris Found First One To Be Huge Success

Because of the success of the first traffic subway, Paris is pushing the construction of additional ones. These passages are designed to insure the continuity of the circular road built in place of the former fortifications surrounding Paris. This road, complete, will be nearly 20 miles long, 133 feet wide, and will permit the passage of six rows of cars. Side-walks on each side of the road are over three feet wide. Where this circular route meets the main arteries leading out of Paris it has been attempted, wherever possible, to direct traffic around a central plateau which serves as an axis. This eliminates to a certain extent the danger resulting from the crossing of cars from various directions and helps to reduce traffic tie-ups.

## Arcades For London Streets

## Expert Predicts City's Shopping Centres Will Be Covered

Women will soon be able to do all their window-gazing under cover in London, according to a merchandising expert, who says that the shopping centres will be a series of arcades. Mannequins will emerge from the shelter of the stores, where they already are continuously on display, and appear in windows in place of the present wax figures, which have gone from the realistic to the fantastic and back again.

## WAS CONSTIPATED FOR 30 YEARS

## Woman's Long Search For a Remedy

The trouble with most remedies for constipation is that they are temporary, that they give only temporary relief. Having at last found a permanent corrective, she writes to tell us about it.

"For upwards of 30 years I was a victim of acute constipation. I tried practically everything that I was possible to try. I admit I was a chronic case, and every new remedy I tried helped for a day or two—after that I was just as bad as ever. Three months ago I took my first taste of Kruschen Salts, and every morning since, and every morning so long I live, my first duty upon rising is my Kruschen. I honestly feel a different woman. My bowels act to the clock, and my friends remark how well I am looking. My only regret is that I didn't try Kruschen years ago."

(Mrs.) A. M. Kruschen Salts is Nature's recipe for maintaining a condition of internal cleanliness. The six salts in Kruschen stimulate your internal organs to smooth, regular action. Your system is thus kept clear of those impurities which, allowed to accumulate, lower the whole tone of the system.

## English Town Thrift

The changing times have not changed the Yorkshireman's thrift. When the people of East Winton in North Yorkshire met to arrange their jubilee celebrations they found the village still had a balance left over from the coronation of their Majesties 25 years ago. So East Winton will use it to celebrate their jubilee.

## Object To Uniform

Typists of Turkey are angry over the threatened rule of the Turkish government that they must wear a standardized uniform. A bill introduced in the Ankara parliament declares that the girls have dressed too frivolously, and they should wear a dark and simple costume. The typists declare such a rule would prevent them from developing their individuality.

## Best She Could Do

A rather stout woman was making herself a nuisance in the big shop which was holding its annual sale. Nothing, it seemed, would suit her, and the unfortunate shop-assistant was beginning to get a little weary. "Haven't you anything ready-made that will fit me?" asked the customer at last. "Yes, the umbrellas and the handkerchiefs are downstairs, madam," the girl replied.

## "Growing" A Sea Wall

## Rice Grass Effective In Preventing Flooding Of Land

The cultivation of rice grass on the low-lying lands of Essex and other similar mud flats in England may result in turning thousands of acres of waste land into profitable pasture. Spartina grass became known in Great Britain about 100 years ago through a few seeds dropping accidentally from some cargo ships at Southampton Docks. They took root and formed a hybrid with British grass which attracted the attention of agricultural scientists who saw the possibility of "growing" their sea wall instead of spending thousands of pounds on sea defence to prevent the land being flooded. Experiments have proved that such a wall is not worn away by the tide, and now Holland and Australia are planting rice grass with a view to converting large tracts of marshes into pastures.

## Bonus Paid On Coal

## Canada Has Paid Out Over Six Million Dollars Since 1928

Since 1928 Canada has paid \$6,781,176 in subventions and other forms of assistance to aid the coal industry in the Maritime provinces and Alberta, a return tabled in the House of Commons said. Of that amount \$4,457,992 went to the Maritimes and \$1,829,858 to Alberta.

Payments made generally by the trade and commerce department to assist in placing Canadian coal used in the manufacture of iron or steel on a basis of equality with imported coal amounted to \$465,273, while "additional payments" made under the Domestic Fuel Act to the Maritime coal industry totalled \$87,853. From 1931 to the present the amount of bonus paid on wheat was \$12,708,576. The outlay in the year 1931-32 when the five-cents-a-bushel bonus was in effect was \$10,908,428.

## Correspondence Of Kings

## Findings In Palestine Date Back To 700 B.C.

The correspondence between two kings dating back to the time of Jeremiah, 700 B.C., has been discovered by the archaeological expedition led by Prof. J. L. Starkey, of Great Britain, it was learned.

The discovery was made at Tel Ad-Dumweir, ancient city of Lachish. It consists of 12 Ostraka fragments, which are taken to be an exchange of secret letters between the kingdom of Judah and the kingdom of Babylon or Egypt.

Details of the findings were made known to the Palestine government, but were not given out to the press.

## Should Be Lucky

## Schoolmaster In England Has Collection Of Unusual Horseshoes

A schoolmaster at Wimbledon is an ardent collector of horseshoes. But not ordinary horseshoes. He specializes in ancient horseshoes. The walls of one of his rooms are covered with scores of them. They even overflow to other rooms. One of his horseshoes was discovered on the site of a Roman camp. In all probability it was cast from the foot of a charger ridden by a Roman general.

## School Named After Prince

The Prince of Wales has consented to his name, being given to a school for underprivileged boys established in British Columbia along lines identical with similar schools set up in Australia for some years past. The institution in British Columbia will be known as the "Prince of Wales Fairbridge Farm School."

It was a great Roman who said two thousand years ago, and it is still true, that those who take friendship from life blot out the Sun from the world.

# BIG Size BIG Value BIG Satisfaction BIG BEN THE PERFECT Chewing Tobacco

## Installs New Equipment

## Montreal Institute One Of Leading Cancer Cure Hospitals

The Radium Institute of Montreal became one of the leading cancer treatment hospitals in the world with installation of apparatus generating 500,000 volts. The institute hopes to raise the voltage mark to 1,200,000 in a short while, Dr. J. E. Gendreau, director, announced.

"Ultra penetrating" X-rays at a voltage of 500,000 were put in operation only after extremely careful physical measurements preparatory to cancer treatments, and the apparatus has been used for the first time on patients," Dr. Gendreau said.

"This apparatus is the largest and most powerful in Canada and is surpassed by but a few in the United States or Europe," he said. He stressed the necessity of adequate institutes in different countries to fight cancer with great success.

The world has about six million square miles of ice to-day, most of it in Antarctica, but the last ice age was at its height there was about twice as great an area of the world ice-blanketed.

## Pedigree Certificates

The total number of pedigree certificates registered by the Canadian National Livestock Records, approved by the Dominion Minister of Agriculture, for the month of February 1935 was 6,916, as against 6,489 for February 1934. Horses numbered 228; cattle, 2,111; sheep, 481; swine, 450; dogs, 529; foxes, 2,926; poultry 190, and one goat.

## THE TENDERFOOT

By GEORGE B. RODNEY

Author of "The Coronado Trail," "The Canyon Trail," Etc.

### SYNOPSIS

"You've fallen heir to a half-share in plenty of trouble," the lawyer told Gerald Keene. "The Broken Spur has been systematically looting the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

Dad Kane, desert rat and luckless prospector till now returns to tell Dustin and Spike Goddard, who had grubstaked him, of his discovery of a rich gold mine, and shows samples of the ore.

Dustin unexpectedly comes along while Stone and Edith are riding fence, and seeing them, stops and talks to Edith. He mentions their dispute could be settled by marrying him, and Edith refuses his proposal with remarks that make Dustin furious. He insults Stone, who promptly throws him into a pool of water.

Dustin learns that Gerald Keene has been sent for, and also that Duro Stone has seen the Broken Spur men rustling Kears's cattle. He sets out with Dad Kane to learn the location of his gold discovery. Dad Kane shows Dustin the mine.

They go back to camp, and Dustin shoots Kane. He fixes the shooting on Peyotl Gregg, a drug addict, who, stupefied by the narcotic he had taken, did not know whether he was guilty or not. They bury Kane and then return to the Broken Spur ranch. Meanwhile at the Hour Glass, Carr, Crewe and Stone speculate as to the meaning of entries in the notebook belonging to Dad Kane that Stone had found. Stone thinks of a possible

solution, and, accompanied by Edith Carr, rides out to Red Water to test out his theory, which proves correct, and they find the rich gold deposit mentioned in the prospector's notebook. As they return to the ranch, they meet Dustin leaving the house, who purposely, but unsuccessfully tries to ride down Stone.

Sam Dustin, the day before Gerald Keene's arrival in Seco, cunningly suggests to Peyotl Gregg that Keene or Kane was a relative of the old prospector, and was seeking information as to the old man's whereabouts. If Peyotl wanted to live, and prevent finding out about the murder, Gregg should shoot Keene when he arrived.

(Now Go On With The Story)

### CHAPTER XV.—Continued

Already elated by the drinks he had had at the dinner and by the arrival of his young partner, Carr was ablaze. His face was flushed and his voice cheery as he headed for the bar. Behind him Frank Crewe kept close. He hated nights like this and he waited only the first chance to get old Joe back to the Hour-glass. At a word Carr turned on him.

"Oh, shut up, Frank. I've not been in town for a year. This is my night to howl... Here Stone... I grabbed Duro by an elbow. "You and Kane are the boys for my money. You've come just in time. Keene. We'll go into closed session to-morrow and show the Broken Spur a thing or two... Come up, Keene, an' take your liquor..."

Peyotl's eyes focused on the slender figure that stood by old Joe's side. So that was the man who meant to hang him! His eyes lit redly! He licked his lips with a dry tongue and stared across the room. The door slapped open and Sam Dustin slouched to the bar. If his quick glance took in that back door, if he saw the dark figure of Peyotl huddled in the shadows, no one knew it.

"I reckon we can do better at the hotel, Mr. Carr..." Peyotl saw the newly arrived Gerald Keene touch the old ranch-man's arm and he caught the sharp reply. "Better'n what? This liquor's good enough. I'm tired of talkin'. Seems like I've been talkin' all my life. You're all right, son. Any nephew of old Peter Vinton's bound to be all right. Not like these lousy Broken Spur heel-taps. They've been lootin' hair an' hide off the Hour-glass for five years now an'..."

He swept on in a mad speech. There were Broken Spur men in that crowd and at a motion from Dustin they swept aside into a group, dark-faced and angry; ready to start a fight at a moment's notice. Peyotl sensed the tenseness. Suddenly Carr swung away from the bar and with Gerald Keene at his elbow headed for the roulette table.

"G'd me a stack of chips... Not white... Blue an' reds... Now watch! I'm playing Cripple Creek eleven..." One, three five, seven an' eleven..."

Twice he repeated his plays and each time the reluctant cashier thrust his winnings across the table. Suddenly the big electric light over the table flickered and died and a voice shrieked out:

"Somebody's changin' his luck. A nigger passed the power-house. Keep your hands on yore winnin's, you wall-eyed fools..."

The big light blinked once and went out again in a blackness that tasted of smoke and dirt and sweat.

"Somebody see what the hell ails that wire. Look to the fuse-box!" Peyotl heard the front door slam. This was the one moment that might never come again. It was the opportunity he had hoped for!

He wriggled like a cat inside that door and headed straight for the roulette table where had seen Gerald Keene standing by the elbow of old Joe Carr. He knew that room as a horse knows his own stall and at six feet a man cannot miss even with a two-and-a-half-inch Derringer. The darkness hung like a curtain. Men pawed about the floor waiting for light but before that light could come there was a short, barking report, a curious metallic smack like a fire-cracker exploding in a can, but there were no sparks to break the darkness. Then suddenly the room was flooded with white light that blinded every eye and men blinked at each other dazed and staring.

"God God! Look there..." A man shrieked out in terror. Gerald Keene lay across the roulette table with blood running over the green cloth and his fingers convulsively clutching at the wheel.

"Shut the door!" shouted a voice from the rear. "A man's been shot..." That was no new thing in the Silver Dollar but the doors shut as if by magic. Stone thrust the milling crowd aside and was in turn forced back by Crewe.

"Let me have him..." Stone laid the limp figure on one table. "For God's sake some one get a doctor. The man's been shot..."

"Who is he? Where'd he come from? Who is he? A dozen voices shouted the questions as though the answers could make any difference. "It's Gerald Keene, half-owner of the Hour-glass," said Crewe. "He only got to town this evening..."

"Keep that door shut till the Sheriff gets here," said a sharp voice. "This is a matter for the law I reckon..." Dustin strode forward. His hat was awry; his coat half-off and his face was red. Anger was plain. Crewe took one look at him, but Joe Carr was first.

"By God," he said. "It's a new card to find Broken Spur men on the side of law an' decency. But the man's right..."

"Hold everybody..." Big Jim Garay, the Sheriff barged into the room, slammed the heavy front door and locked it. "This calls for a showdown," he said. "Who fired that shot?"

No one answered him. The light smoke filtered up through the lamp and the bartender hammered at the closed door. He had gone at once for Doctor Epps, the "vet," the only doctor Seco boasted who would be sober at that hour. Garay opened the door and Epps, the doctor, pitched into the room. "Gang, the bartender thrust him toward the roulette table where the wounded man lay with his head on Stone's arm."

"How bad he hurt, Doc?" Logan retrieved from the bar his only specific for gun-shot wounds... a bottle of whiskey and held it to the victim's lips while Epps made a hasty examination.

"Just above the liver," he said finally. "Looks mighty bad to me." "Good God! D'you think he'll die?" demanded Crewe.

"Huh. We'll all die. Some'll go before the rest. That's all I can promise right now. Logan, let me have that bottle..." He was poking and prying in the clothing of the wounded man. "Here's what hurt him. The bullet went clear through him..." and he held up to their gaze a stubby, soft-lead bullet. "It's

"I spoiled the lot because I didn't use KEEN'S!"

"I tried that recipe you gave me for Mustard Pickles Mary, but it didn't turn out at all like yours."

"That's too bad, Jane. I've always had such wonderful results with Keen's Mustard!"

"Oh, I didn't use Keen's!"

"There's your trouble, Jane, right there. Keen's Mustard has the strength, flavour and 'nip' that is not found in any other."

**KEEN'S D.S.F. MUSTARD**

Made from seed grown especially in the West of England. The shells or hulls are removed all the seed being in the inner part of the seed. A superior grinding makes the full flavour readily available. Is original tin for as little as 10c.

Corbin-Keen (Canada) Ltd. Ltd. 1000 Avenue Street, Montreal, Que.

## TO ALWAYS GET FAST PAIN RELIEF

An Aspirin tablet starts disintegrating as soon as it touches moisture. That means that Aspirin starts "taking hold" as soon as even a bad headache, neuritis or rheumatic pain almost instantly. And Aspirin is safe. Doctors prescribe it. For Aspirin does not harm the heart.

Be sure to look for the name Bayer in the form of a cross on every Aspirin tablet. Aspirin is made in Canada and all druggists have it.

TRADEMARK REGISTERED IN CANADA

a Derringer bullet," he said. "Til bet there hasn't been one of these fired since the Civil War. The question is... Who fired it?"

Stone thrust forward impatiently. "Sheriff," he said sharply; "for Heaven's sake get some action to the present."

"Lay your guns on the bar," he said. "Every man's under suspicion till this mess is sifted. Has anybody left here since the shooting?"

"No, No..." A dozen men swore to it. "Not a soul has left." Stone laid his own gun on the bar and stared at Dustin who followed suit. Every man in the room trooped up to the bar and laid his gun on it to be carefully examined by Garay.

"Some one in this outfit's got a Derringer cached," he said curtly. "We've wasted time over a lot of forty-fives when I know it was a forty-one hit him. "You first, Dustin..."

Dustin raised both hands and grinned as his questioner felt every inch of his person. Then he stepped aside and man after man was subjected to the closest examination. Each as Garay nodded, stepped back grinning.

"Nothin' doin'," he said sharply. "You can all of you go..."

One by one they departed and Garay examined every window in the room but all were closed. No pistol could have been thrown out after it had been fired.

"Dammed if I kin figger it out," muttered Garay. "There's nobody left but the Hour-Glass men. It's sure they never shot one of their own crowd. However... I got to search you all," he said suddenly. "You first, Stone..."

Carr, still a little dazed by the liquor he had drunk and by the rapidly occurring events, stood staring at them as, first Stone and then Crewe, stepped up to Garay and were examined.

"... You now, Joe..." (To Be Continued)

**Are You Rundown, Tired?**

Mrs. Mabel Murphy of 13 Westbourne Ave., Apt. 4, Hamilton, Ont., writes: "About five years ago I was terribly run-down, couldn't sleep or eat, lost weight, fell off 20 pounds. I had finished the first bottle of Dr. Fere's Favorite Prescription. I felt much better, had more strength and better digestion. Now size, tablets or liquid, \$1.25.

**Makes Generous Offer**

Saskatchewan Postmaster Will Aid Jubilee Cancer Fund

The King George V. silver jubilee cancer fund management has received from a Saskatchewan village postmaster an offer to donate to the fund all the profits from his private business between now and the end of the campaign, May 6.

The postmaster wrote he operated a newspaper agency in addition to his post office and was prepared to surrender all profits from that business. The management noted in a press communication that contributions from individual clergymen "constitute the largest number from any one group."

The new general manager was inspecting the branch office. "How long have you been working here?" he asked the office boy.

"Ever since the day the boss threatened to sack me," replied the young man.

A total of 5,899 cattle and 18 calves were exported from Canada to the United States from February 7 to 21, 1935.

## Little Helps For This Week

The Lord heareth your murmurings which ye murmur against Him. Exodus 16:8.

Without murmur, uncomplaining. In His hand. Leave whatever things thou canst Not understand.

One great characteristic of holiness is never to be exacting—never to complain. Each complaint drags us down a degree in our upward course. If you would discern in whom the spirit of God dwells, watch that person, and notice whether you ever complain.

When we wish things to be otherwise than they are we lose sight of the great practical parts of the life of holiness. We wish and wish when, if we had done all that lies on us, we should fall quietly into the hands of God. Such wishing cuts the very shew of our privileges and consolations. You are leaving me for a time; and you say you wish you could leave me better, or leave me with some assistance; but if it is right for you to go it is right for me to meet what lies before me without a wish that I had less to meet, or were better able to meet it.

### Times Work By Candles

When Two Burn Out English Flint-Knapper Goes Home

There is one man in England who still times his work by candles.

He is George Ashley, who burrows deep in the earth at Brandon in Suffolk, searching for the flints which his mate Herbert Field chips to fit the old flintlock guns still used in primitive places. They are two of the last flint-knappers, and old Mr. Ashley is surely the only man in England who prefers a candle to a watch as a timekeeper.

Though he is seventy-one he still makes his way each morning down a shaft fifty feet deep, looking for flints as did Stone Age men in pits closed by when they wanted to renew their arrowheads and axes. Besides his lunch he takes with him two candles, and when these are burned through he climbs up out of the pit and goes home. They tell him when his day's work is done.

### Housing Plan

Housing Scheme In Winnipeg Most Successful

The 1920 housing scheme had been "most successful" in Winnipeg, Alexander Officer, chief inspector of the division of sanitation and housing, told the parliamentary committee on housing at Ottawa.

The house had been built at an average cost of \$4,000 for "peculiar men," who liquidated their obligation in the form of rent over a period of years, he said. The city housing commission had met all its obligations and continued to have money in hand.

Mr. Officer emphasized his own participation in the scheme was public health. In Winnipeg, out of 46,810 houses, there were only 247 without sewer and water connections. He doubted if there was another city in Canada with the same record.

### Say It In Greek

A great Greek scholar, when visiting a woman's college in the United States, was asked whether he would do the institution the compliment of translating their college motto into Greek. He most courteously agreed and then asked what the motto was. It was placed before him and he read the words: "Pep without purpose is piffle."

A new solderless connector for electrical work eliminates the use of blowtorch and soldering iron, and assures a perfect connection.

In the strait and narrow way you avoid traffic jams.

## The Ottawa Letter

The somewhat contradictory phrase "passive resistance" is being demonstrated in the House this session in a rather curious manner. The Liberal opposition, ready to talk for days and weeks on end in previous sessions, is almost completely silent on measures brought in by the government, contenting themselves with an occasional protest on the constitutional aspects of the bills but taking little part in discussion of the clauses. If the Independents were equally passive the debates would have about as much "punch" as shadow boxing. Whoever is responsible for this line of policy certainly displayed a political astuteness evidently unexpected in Liberal ranks and the results are apparently rather disconcerting to the government. From former accusations of "blockade" of government measures the official opposition is now reprimanded by the Minister of Railways for passing the clauses in a light-minded manner and trying to kill the bill by ridicule. Mr. King, as he expressed it last week, "is not being manoeuvred into" any untenable position and his brief statements, made of deliberate intent, are in decided contrast to his elaborate dissertations of previous years. That the official opposition is fixed constitutionally on the inevitable election is evident in many ways, especially in the large number of questions and orders for return with the obvious object of securing unanswerable data for use in the campaign, although there seems no probability of an election before late summer. The voters list, comprising over five million names, are now being printed but many people are feeling very doubtful on their accuracy and it would not be a very popular move to bring on the election without the revision provided for in the Act, even if the Prime Minister's health made it possible. Bulletin in this connection are reassuring but there is little prospect that the head of the government will be back in the House before Easter.

HON. H. R. STEVENS

Mr. Stevens, still busy with the Price Spreads Report, made a brief appearance in the House and his first speech this session was on constitutional rights from a layman's standpoint. The Minister of Trade and Commerce shares with the Liberal leader the distinction of being one of the comparatively few leading lights in the House who do not belong to the legal profession. Upon introduction of the measure for a federal minimum wage law, Hon. Mr. Lapointe again questioned the power of the government to deal with these matters, while Hon. Mr. Cohen, also a lawyer, defended the government's stand, whereupon Mr. Stevens interposed from the non-professional point of view. "We have heard today two very learned dissertations on the legal aspects of the constitution and no doubt my lawyer friends in all parts of the House will characterize my intervention in this debate as the action of 'a fool who rushes in where angels fear to tread,'" said Mr. Stevens, "but I submit that instead of debating day after day technical points with hair-splitting legal arguments pro and con, if we could restrict for one session of parliament the co-operation of the legal gentlemen of this House we could have a successful issue of many of these problems. I do not suggest that we should disregard provincial rights but some of the provinces recognize there are problems which must be dealt with, and if we approached them in a spirit of co-operation, with a desire to solve these problems in a spirit of harmony we should make progress." Mr. Stevens took the stand that the federal parliament has "failed to occupy the field properly given to it by the British North America Act" and quoted from subsection 2 of Section 91 as follows: "It is hereby declared that (notwithstanding anything in this Act) the exclusive legislative authority of the parliament of Canada extends to all matters coming within the classes of subjects next hereinafter enumerated, that is to say, the regulation of trade and commerce."

"Had this parliament, twenty or thirty or fifty years ago, set itself to the task of regulating the regulation of trade within Canada there would be no challenge of its rights at the present time. I am just as jealous of the constitution of Canada as are the hon. gentlemen opposite but no harm will ever be done the constitution by a frank discussion in this House, or by searching through it for powers in order to bring about legislation which we think is good for the people of Canada" declared the former Minister. No date has been set for the Price Spreads report as yet but when the report is received no doubt much more will be heard from Mr. Stevens.

## ECONOMIC COUNCIL

Another measure forecast in the Prime Minister's broadcasts, to provide for the formation of an Economic Council, has received second reading and passed the committee stage. The Council will be composed of seven government officials, five members of economic bodies and three experts with the Prime Minister as chairman and the Minister of Finance as vice-chairman. The Council will be charged with the task of making recommendations to the Ministers, especially the Prime Minister, the co-ordinated knowledge and activities of the higher civil servants with a view of relieving the government of much detail work. It will also carry on research work in the field of the economy of making a very complicated economic problem, today and to be in a position to advise the government on these questions. Some thirty or more countries of the world have already set up similar councils. Hon. MacKenzie King declared himself in complete accord with the measure but questioned whether the Prime Minister should be responsible, as it would be absolutely necessary, as it would be in the future, to bring his results in, rather than lessening his already too heavy burden, and from his own experience the Liberal leader would suggest that such a body work in connection with the Research Council already functioning, and that the Prime Minister have assistants in the present governments of the present two or three highly-trained and able men selected by the leader of the government for this special purpose. He would suggest also that if the bill were passed appointments to such a council should be left until after the election, as it would be absolutely necessary to have complete harmony between the council and any government in power. The third group also approved the principle of an economic council but considered the present proposed set-up would be only a "fleshless ghost" of the economic council advocated by that group for the past several years. Mr. Irvine (U.F.A.) proposed an amendment to Section 6, defining duties of the council, and that it "recommend the government policies calculated to distribute the goods and services which are now available or may be made available as the result of our increasing productivity" but this was negatively by a vote of 13 to 11.

The rapidity with which the official opposition passed the sections of the bill drew from the Minister of Railways a vigorous rebuke for which the opposition discussed a bill they were obstructing it and if they passed it without discussion they were killing it with kindness. The passage of the bill is of course assured.

## FREIGHT RATES IN B. C.

Mr. Reid, the indefatigable member from the West, brought in for the fourth time a bill to place British Columbia on an equality with other provinces in the matter of freight rates. Mr. Reid made a most eloquent appeal for justice in this matter, reviewing the many ways in which British Columbia has been discriminated against, ever since railways were built in that province, and he declared the Board of Railway Commissioners, controlling the country \$350,000 annually, has apparently lost sight of the fact that it was set up with a view of protecting

the people from the railways and not the railways from the people. "We are not asking anything unfair; we are asking only for treatment equal to that enjoyed by the eastern and prairie provinces," said Mr. Reid. "It is useless for us in British Columbia to appeal to the Board of Railway Commissioners. I cannot make that statement too emphatic. The records show it to be true and I submit that this parliament, as the highest court in the land, is the place where this injustice should be righted." The Minister of Railways said the government could not accept the bill. It would be a dangerous precedent for any government to attempt to fix freight rates as it would be overwhelmed with requests from all parts of the country and would have time for nothing else. "The Board of Railway Commissioners was set up in 1904 for this purpose and while I do not say it is a perfectly functioning body today the question of reformation of the Board is an altogether different question to that of fixing freight rates," said Mr. Manion. The hour for private members' bills coming to a close at this point the matter was dropped.

## The Women's Corner

## FOOD IDEAS

To add a little cinnamon, cloves or allspice to your cranberries gives them a different taste.

Senson apple sauce with cinnamon nutmeg and lemon juice, and fold into it a cup of whipped cream. Freeze this in the mechanical refrigerator without stirring.

## VEAL "BIRDS"

Cut a pound and a half of veal into six pieces and sprinkle with salt and pepper. Into each piece fold meat stuffing and roll it up, tying it with a string. Sprinkle the roll with flour and brown in hot bacon fat. Add enough water to make steam; bake covered, for one hour. Remove the string, before serving. Garnish with parsley, water cress, sliced tomatoes, or with carrots which have been baked with the "birds".

Eggs are not the only thing that may be served with ham. A new combination is apples and sweet potatoes, baked with it. Get a slice of ham one inch thick, and rub a little brown sugar into it and stick a few cloves into the fat. Lay this in the bottom of a baking dish and pour over it a half cup of water to which you have added the juice of half a lemon. Bake in a moderate oven about forty-five minutes.

There are some things which cannot be organized. For example—Love. The home—must always be a place of freedom, of originality, of uniqueness. Love is killed by too much regulation. The ideal home is not big in love and small in business.

## ARGENTINA KILLS WORLD

## WHEAT AGREEMENT

The world wheat pact signed by some 22 important nations in 1933 which was supposed to continue until August 1935 was virtually disrupted at the delegates' meeting which was held in London last week. Argentina's refusal to meet the proposals of Australia, United States and Canada blocked further progress. Last fall at Buenos Aires, Argentina openly repudiated the pact on the ground that it was unfair to her. Ever since then her attitude has consistently been in opposition to the continuance of the agreement. At present the secretariat organization is being maintained in London, but immediate hopes for revival of the agreement are slight.

## INFESTATION OF HOPPERS MAY BE LIGHTER '35

## Heaviest Infestation Predicted West—South Comparatively Light

(By H. L. Seaman, Dominion Entomologist, Lethbridge, Alta.)

The farmers of Alberta are confronted with another grasshopper outbreak for the coming season. While the numbers will be greatly reduced from what they were in 1934, control measures are going to be taken in several sections of the province. The accompanying map shows more clearly than words how the outbreak is expected to develop this season. This map is the result of extensive surveys conducted by the Dominion Entomological Branch to determine where grasshoppers were abundant and where eggs were laid during the fall of 1934. The severity of the expected outbreak is shown by the degree of shading on the map.

Three species of grasshoppers are involved in this year's outbreak. The lesser migratory or sub-arctic grasshopper (*Melanoplus mexicanus*) is not as generally abundant as last season, but is present in all localities. The two-striped grasshopper (*M. bivittatus*) is much reduced in numbers, and is present in only a few districts. The roadside grasshopper (*Camassia pellucida*) is abundant in all the very severely infested areas, and shows some increase and spread over last season. This last species, largely confined to its egg-laying to roadsides, headlands and over-grazed pastures.

The seriousness of the outbreak in any given place will depend largely on the weather during the spring. If the season should be as dry and warm as in 1934, the grasshoppers will cause considerable trouble and crop loss. There will be districts in the area marked "light and patchy" which will probably require some poisoning. On the other hand, if there is a week of cold, wet weather soon after the young grasshoppers hatch, the danger will undoubtedly be greatly lessened. No matter how favorable for grasshopper control the weather may be, some trouble may be expected in the areas marked "severe."

No farmer can afford to ignore the grasshoppers this coming season. The map is not absolutely accurate, but is a guide to the areas where eggs are known to have been laid. Small areas of severe egg deposits may have been missed in the surveys, and each farmer should be guided by the numbers of grasshoppers which were present on his own farm during July and August of last year. Where the roadside grasshopper was abundant along roadsides, headlands and over grazed pastures, particular care must be maintained to see that the young grasshoppers hatching from these egg-beds do not spread into nearby fields.

## RABBIT-PROOF SHRUBBERY

(Experimental Farms Note.)

It is doubted that if food were scarce enough in any given place there would be such a thing as rabbit-proof shrubbery.

Generally speaking, however, we find that rabbits show fairly definite tendencies in their selections from a large menu. The Dominion Experimental Substation at Beaverlodge, Alta., has found that it can have sufficient apple-tree bark to eat this "icing" first. Closely ranked elm, Scotch pine, blue spruce, rose willow and poplar. At the other extreme of the menu he has left Chinese lilac (*Syringa villosa*). He was unable to turn up his nose at pines, pines (*Prunus pensylvanica*), c-c-m-m-juniper (*Juniperus communis*), hazelnut (*Corylus rostrata*, red-barked and American elder (*Sambucus racemosa*) and S. americana. Manitoba aspen and ash were also eaten, but not for anything better. Several species of caragana, including the common Russian pea tree or caragana arborea, were rejected on the Substation but in districts where the board was less ample he seemed to make do in some cases along with white poplar and balsam. In one instance reported to us balsam and spirea were spared until the last. The native huckleberry and saskatoon were ignored, but we find the rabbit's appetite for a variety of the Tartarian huckleberry insatiable. Sappy growths of Manitoba wild plum were fairly tasty but mature specimens did not claim his attention. Native dogwood, Indigo bush, salt bush, nine bark, ornamental species of currant, willow, shrubby dogwood, Mal day tree, choke-cherry, buckthorn and snowberry can all claim immunity to a greater or less extent in the presence of those which are more delectable but it cannot be promised that they will always escape his attention. Cottonmaster acutifolia, that attractive, well adapted shrub, was fairly appealing to the rabbit.

J. H. Crossley  
Dominion Experimental Substation, Beaverlodge, Alberta.

It is recommended that all land to be cropped, except that summer-fallowed in 1934, be shallowly cultivated as early as possible, particularly that lying in the two areas shown on the map as being more severely infested. The object of this cultivation is to expose and destroy on the surface of the soil so that they will dry out instead of hatching. The eggs at present are laid in the soil and are only one-half inch of the surface, and if the cultivators or dikes are set so as to work deeper than this, they are likely to keep the eggs covered and feed the purpose of the cultivation. Wherever the mould-board plough can be used, good control can be obtained. By ploughing to a depth of more than four inches, and then packing the soil. For this ploughing to be effective the furrow slice must be turned completely up and down, so that the eggs will be well buried under packed soil. Fields that were winter-fallowed in 1934 and the soil was not sold after July 1 are not likely to be infested with eggs, and need not be cultivated as a grasshopper control this spring.

Farmers are urged to watch for the first signs of grasshoppers hatching this spring. The newly-hatched grasshoppers are less than one-quarter inch long and must not be confused with those harmless prairie forms which spend the winter partially grown and hatched in the spring. These forms will be found to be over one-quarter inch long and over one-half inch long.

The first hatching of the economic grasshoppers in 1933 was reported on May 26, while in 1931 eggs began to hatch on April 25. The time of hatching for any year will depend on the weather conditions, but with warm, dry weather in April eggs may begin to hatch any time after April 20.

As soon as hatching is under way, should be secured from the local mixing station and spread as thinly as possible among the grasshoppers. A careful and thorough poisoning of these restricted areas where grasshoppers are hatching may save considerable time and expense later. This is particularly true of the concentrated hatching grounds of the roadside grasshopper, where there are usually enough eggs laid in less than one acre to supply the grasshoppers that will later be spread over several hundred acres.

Parasites cannot be expected to be of any material assistance in controlling the grasshoppers. During the 1934 season, fresh flies were very abundant, and in restricted localities as high as 90 per cent of the grasshoppers present in the summer were parasitized. In the province as a whole, parasites did not destroy much more than 10 per cent of the grasshoppers. The value of parasites is greatly decreased when it is realized that they usually attack the full-grown grasshoppers, at which time the damage has been done. When a successful poisoning campaign has been conducted, parasites may destroy a high percentage of the remaining grasshoppers and reduce the degree of infestation for the next season.

All farmers in the infested areas are urged to plan now to carry on grasshopper control work this coming spring. Concerted action at the right time and particular attention to the instructions for using poison will do much to hold the crop losses to the minimum. In spite of occasional reports to the contrary, excellent control can be effected by using the standard bait when it is scattered properly.

## THE CHINOOK ADVANCE

Published by Mrs. M. C. Nicholson every Thursday afternoon from The Advance Building, Main Street, Chinook, Alberta, and entered in the postoffice as second class mail matter.

The subscription rates for the Advance are \$1.50 per annum in Canada and \$2.00 outside of Canada.

The transient advertising rates in the Advance are—display, 40c per inch for first week and 30c for each succeeding week, providing no change is made. For heavy composition an extra charge is made for first week. Reading notices, 10c per count line. Legal advertising, 15c per count line for first week and 10c for each succeeding week. Cards of thanks, \$1.00.

Advertisements under this heading are charged at the rate of 50c for 25 words or less per week, with 10c for each additional 5 words. Three weeks for the price of two.

All letters addressed to the editor for insertion in The Advance, must be designed to show bona fide of the writer. Publication in all cases is subject to the judgment of the Publisher. We do not necessarily coincide with views expressed.

Night Flowering Catchfly, Perennial Sow Thistle, Purslane, Red Root Pigweed, Russian Pigweed, Russian Darnel, Shepherds Purse, Stinkweed, Umbel weed, Wild Oats, Wild Buckwheat, Yellow Foxtail.

The weed seeds lost their ability to germinate after two weeks ensilage. This new survey will do much to add to the assistance which line elevator companies have been to farmers in their fight against weeds.

## PENSIONS BOARD

Probably for the first time in the history of the Department of Pensions the vote \$42,000,000 was thrown with practically no complaints of the administration by the Board. In reply to a question the Minister (Col. Sutherland) said the break of this expenditure has evidently been reached under the present legislation on this account the Board of the operation of the Board under the old chairman, Justice Taylor, appointed last year, expressed great satisfaction. Some suggestions were offered for further improvements, particularly for a reduction in the expenditure so a man who came up for re-examination would not be re-examined by the staff doctor. "Some of these officers are not big enough to change their opinion even though the condition may be progressing," declared Gen. Ross (Col. Kingston) with a laugh. Mr. Speckman (U.F.A.) agreed. These members also agreed that the returned men are much better satisfied with the treatment they are getting under the new Commissioner. "Instead of a curt note, 'application refused' they receive courteous notice informing them why they have been refused, thus giving them a reasonable chance to strengthen their case where possible."
